

10 YEARS – EXTENDED WARRANTY FOR PIPETEC PIPE SYSTEM

We hereby confirm the extensions to our warranty for our PIPETEC Connect pipe system, consisting of our PIPETEC pipelines and our PIPETEC fittings.

We confirm that we will provide replacements for a period of 10 years from the date of purchase for the following products and damage:

- The extended warranty covers all system components of the PIPETEC Connect pipe system, such as pipes, pipe connections and connecting pieces, provided that they were supplied by us.
- Laying and installation errors are explicitly excluded from the warranty. Our technical manual and our installation instructions in the manual are definitive in this regard. In order to qualify for the extended warranty, the installation must be carried out only with the system components and tools specified by us. Pressure tests must be carried out correctly.
- The extended warranty covers damage that can be traced back demonstrably to production or material faults, insofar as PIPETEC was responsible for them. Furthermore, the warranty covers damage caused by production errors in items from third parties.

- The extended warranty also covers third-party expenses incurred as a result of rectification, dismantling, inspection or exposure of defective products and installation and laying of defect-free products to be supplied by us.

The cover is provided through extended product liability insurance with the following cover amounts:

- EUR 3,000,000.00 flat rate for personal injury, material damage and damage to products
- EUR 1,000,000.00 flat rate for financial losses

Bisingen, October 2022
